Contents	Page
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 General requirements	3
5 Requirements for supralaryngeal airways and supralaryngeal airway connectors	4
5.1.1 Size designation	4
5.1.2 Materials	4
5.1.3 Ventilatory opening	4
5.1.4 Safeguards against collapse of the ventilatory pathway	4
5.1.5 Sealing Mechanism	5
5.1.6 Internal Volume	5
5.1.7 Maximum instrument size	5
5.2 Supralaryngeal airway connectors	5
6 Requirements for supralaryngeal airways with connector supplied sterile	6
6.1 Sterility assurance	6
6.2 Packaging for supralaryngeal airways and connectors supplied sterile ...	6
7 Cleaning and disinfection or sterilization	6
8 Markings	6
9 Accompanying Documents	8
Annex A (informative) Rationale	10
Annex B (informative) Guideline for evaluating and documenting the clinical performance of supralaryngeal airways in human subjects	14
Annex C (normative) Test methods to define kink resistance of the ventilatory pathway	16
Annex D (informative) Hazard Identification for Risk Assessment	20
Annex E (informative) Guidance on materials and design	23
Annex F (informative) Bibliography	25

Foreword

This ASTM standard was developed as an American National Standard by ASTM F29 Anesthesia and Respiratory Equipment, Subcommittee F29.12 Airways, Task Group F29.12.07 Supralaryngeal airways in the format of an ISO standard to serve as a guide for future work as a new ISO Standard.

This is the first edition of this Standard.
