NOTICE AND DISCLAIMER

The information in this publication was considered technically sound by the consensus of persons engaged in the development and approval of the document at the time it was developed. Consensus does not necessarily mean that there is unanimous agreement among every person participating in the development of this document.

The Insulated Cable Engineers Association, Inc. (ICEA) standards and guideline publications, of which the document contained herein is one, are developed through a voluntary consensus standards development process. This process brings together persons who have an interest in the topic covered by this publication. While ICEA administers the process and establishes rules to promote fairness in the development of consensus, it does not independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards and guideline publications.

ICEA disclaims liability for personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. ICEA disclaims and makes no guaranty or warranty, expressed or implied, as to the accuracy or completeness of any information published herein, and disclaims and makes no warranty that the information in this document will fulfill any of your particular purposes or needs. ICEA does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide.

In publishing and making this document available, ICEA is not undertaking to render professional or other services for or on behalf of any person or entity, nor is ICEA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances. Information and other standards on the topic covered by this publication may be available from other sources, which the user may wish to consult for additional views or information not covered by this publication.

ICEA has no power, nor does it undertake to police or enforce compliance with the contents of this document. ICEA does not certify, test, or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of compliance with any health or safety-related information in this document shall not be attributable to ICEA and is solely the responsibility of the certifier or maker of the statement.

FOREWORD

ICEA Standards are adopted in the public interest and are designed to eliminate misunderstanding between the manufacturer and user and to assist the user in selecting and obtaining proper products for a particular need. The existence of an ICEA Standard does not in any respect preclude the manufacture or use of products not conforming to this Standard.

The user of this Standard is cautioned to observe any applicable health or safety regulations and rules relative to the manufacture and use of cable made in conformity with this Standard. This Standard hereafter assumes that only properly trained personnel using suitable equipment will manufacture, test, install and/or perform maintenance on cables defined by this Standard.

The Secretary can only accept questions of interpretation of ICEA Standards in writing at Headquarters at the address below, and the reply shall be provided in writing. Suggestions for improvements in this Standard are welcome. Questions and suggestions shall be sent to:

Secretary
Insulated Cable Engineers Association, Inc.
Post Office Box 1568
Carrollton, GA 30112, U.S.A
United States of America

This Standard was approved by ICEA on June 5, 2003. This Standard was adopted by TIA as ANSI/TIA-472F000 in September 2004. This Standard was approved by The American National Standards Institute (ANSI) on January 21, 2005. The members of the ICEA Communications Cable Division, Working Group 717 who participated in this project were:

Ken Chauvin, Chairman

V. Anyanwu	D. K. Baker	G. L. Dorna	M. D. Kinard
R. Lovie	N. Jones	V. Osornio	W. T. Posey
T. Rhoades	J. Rosko	M. Silva	J. Smith
J. Shinoski	D. Taylor	J. D. Coleman	J. Struhar

TABLE of CONTENTS

<u>SECTION</u>	<u>PAGE</u>
Part 1: INTRODUCTION	1
1.1 Scope	1
1.2 General	3
1.3 Units	4
1.4 Definitions	4
1.5 References.....	5
1.6 Information to Be Supplied by the User	5
1.7 Modification of this Standard	5
1.8 Quality Assurance.....	6
1.9 Fire Resistance Codes	6
1.10 Safety Considerations.....	6
Part 2: OPTICAL FIBERS	7
2.1 General	7
2.2 Optical Fiber Classes.....	7
2.3 Optical Fiber Requirements	7
2.4 Optical Fiber Coating and Requirements	7
Part 3: OPTICAL FIBER CORE UNITS	9
3.1 General	9
3.2 Loose Buffer Tubes	9
3.3 Optical Fiber Ribbons	9
3.4 Tight Buffer	11
Part 4: CABLE ASSEMBLY, FILLERS, STRENGTH MEMBERS, AND FIBER AND UNIT IDENTIFICATION	12
4.1 Cabling of Multi-Fiber Optical Fiber Cables.....	12
4.2 Identification of Fibers within a Unit	12
4.3 Identification of Units within a Cable.....	12
4.4 Strength Members	12
4.5 Assembly of Cables	13
4.6 Filling and Flooding Materials	13

<u>SECTION</u>	<u>PAGE</u>
Part 5: COVERINGS	15
5.1 Binders	15
5.2 Shielding, Armoring, or Other Metallic Coverings	15
5.3 Jackets	17
5.4 Other Coverings	17
5.5 Jacket Repairs	18
5.6 Ripcords	18
Part 6: OTHER REQUIREMENTS	19
6.1 Identification and Date Marking	19
6.2 Optical Cable Identification and Other Markings	19
6.3 Length Marking	20
6.4 Cable Remarking	21
6.5 Packaging and Marking	21
Part 7: TESTING AND TEST METHODS	23
7.1 Testing	23
7.2 Extent of Testing	23
7.3 Standard Test Conditions	23
7.4 Testing of Conductive Wires in Composite Optical Drop Cables	24
7.5 Verification of Physical Construction, Color Code, and Identification	24
7.6 Environmental Stress Cracking Resistance Test	24
7.7 Jacket Shrinkage Test	25
7.8 Weathering Test	25
7.9 Verification of Cable Length and Marking Accuracy	26
7.10 Dimensions of Fibers, Tight Buffered Fibers, and Buffer Tubes	26
7.11 Ribbon Dimensions	27
7.12 Ribbon Separability Test	27
7.13 Ribbon Twist Test	29
7.14 Ribbon Residual Twist Test	29
7.15 Tight Buffer Strippability Test	30
7.16 Material Compatibility and Cable Aging Test	30
7.17 Cable Low and High Temperature Bend Test	31
7.18 Cable External Freezing Test	32
7.19 Compound Flow (Drip) Test	32
7.20 Cable Temperature Cycling Test	32
7.21 Cable Cyclic Flexing Test	33
7.22 Cable Impact Test	33
7.23 Cable Cold Impact Test – Fire Resistant Cables Only	34
7.24 Cable Tensile Loading, Bending and Fiber Strain Test	34
7.25 Cable Compressive Loading Test	36
7.26 Cable Twist Test	37
