UL 2556

STANDARD FOR SAFETY

Wire and Cable Test Methods

UL Standard for Safety for Wire and Cable Test Methods, UL 2556

Fifth Edition, Dated April 30, 2021

Summary of Topics

This revision of ANSI/UL 2556 dated June 3, 2021 is being issued to editorially correct the formula for wraps, in G.1(b).

As noted in the Commitment for Amendments statement located on the back side of the title page, UL, CSA, and ANCE are committed to updating this harmonized standard jointly. However, the revisions dated June 3, 2021 will not be jointly issued by UL, CSA, and ANCE as these revisions address a UL editorial correction only.

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The editorial correction in the revisions dated June 3, 2021 is in accordance with Proposal(s) on this subject dated February 21, 2020 and October 30, 2020.

ANSI/UL 2556-2021

Commitment for Amendments

This standard is issued jointly by the Association of Standardization and Certification (ANCE), the Canadian Standards Association (operating as “CSA Group”), and Underwriters Laboratories Inc. (UL). Comments or proposals for revisions on any part of the standard may be submitted to ANCE, CSA Group, or UL at anytime. Revisions to this standard will be made only after processing according to the standards development procedures of ANCE, CSA Group, and UL. CSA Group and UL will issue revisions to this standard by means of a new edition or revised or additional pages bearing their date of issue. ANCE will incorporate the same revisions into a new edition of the standard bearing the same date of issue as the CSA Group and UL pages.

This Standard is subject to review within five years from the date of publication, and suggestions for its improvement will be referred to the appropriate committee. To submit a proposal for change, please send the following information to inquiries@csagroup. org and include "Proposal for change" in the subject line: Standard designation (number); relevant clause, table, and/or figure number; wording of the proposed change; and rationale for the change.

To purchase CSA Group Standards and related publications, visit CSA Group’s Online Store at www.csagroup.org/store/ or call toll-free 1-800-463-6727 or 416-747-4044.

This ANSI/UL Standard for Safety consists of the Fifth Edition including revisions through June 3, 2021. The most recent designation of ANSI/UL 2556 as an American National Standard (ANSI) occurred on April 30, 2021. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page (front and back), or the Preface.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at https://csds.ul.com.

To purchase UL Standards, visit UL's Standards Sales Site at http://www. shopulstandards. com/HowToOrder.aspx or call toll-free 1-888-853-3503.

CONTENTS

PREFACE **7**

1 Scope 9
2 General 9
2.1 Units of measure 9
2.2 Normative references 9
2.3 Safety 12
2.4 Definitions 13
2.5 Test temperature 13
2.6 Reports 13
3 Conductor Tests 14
3.1 Conductor diameter 14
3.2 Cross-sectional area by mass (weight) method 15
3.3 Cross-sectional area by diameter method 19
3.4 DC resistance 20
3.5 Physical properties of conductors (tensile strength, elongation at break, and ultimate strength) 22
3.6 High-current heat cycling for aluminum conductors 25
3.7 Length of lay 27
4 Insulation, Overall Covering, and Jacket Materials Tests 28
4.1 Thickness 28
4.2 Physical properties (ultimate elongation and tensile strength) 32
4.3 Dry temperature rating of new materials (long-term aging test) 39
4.4 Carbon black content 40
5 Components Tests 41
5.1 Coverage of fibrous braids 41
5.2 Coverage of shielding (wraps and braids) 42
5.3 Saturation 42
6 Electrical Tests for Finished Wire and Cable 44
6.1 Continuity 44
6.2 Dielectric voltage-withstand 45
6.3 Dielectric breakdown 47
6.4 Insulation resistance 48
6.5 Capacitance and relative permittivity 51
6.6 Stability factor 52
6.7 Spark 53
6.8 Standard arcing test 56
6.9 Flex arcing test 57
6.10 Jacket resistance 59
6.11 AC leakage current test through insulation 60
6.12 AC leakage current test through jacket 61
6.13 Resistance of armor 62
7 Mechanical Tests for Finished Wire and Cable 63
7.1 Fall-in of extruded materials 63
7.2 Heat shock 63
7.3 Heat shock resistance 64
7.4 Shrinkback 65
7.5 Shrinkback in air 66
7.6 Cold bend 67
7.7 Cold impact 69
7.8 Deformation 70
7.9 Hot creep elongation and hot creep set 72
7.10 Abrasion resistance 74

7.11 Crush resistance 75
7.12 Impact resistance 77
7.13 Impact resistance of insulated cables 78
7.14 Dielectric breakdown after glancing impact 80
7.15 Flexibility at ROOM TEMPERATURE after aging 81
7.16 Flexibility of separator tape under a jacket 82
7.17 Flexibility of armored cable and metal-sheathed cable 83
7.18 Swelling and blistering when immersed in liquid 85
7.19 Durability of ink printing 86
7.20 Color coating 87
7.21 Mechanical strength 89
7.22 Strength and elongation of cable in tension 90
7.23 Bend test on nylon covered conductors 91
7.24 Tightness of insulation 92
7.25 Tightness of armor 93
7.26 Flexing of shielded cables 94
7.27 Mandrel pinch of "-R" cords 95
7.28 Mandrel crush of "-R" cords 96
7.29 Flexing of "-R" cords 97
7.30 Armored cable bushing insertion 98
8 Environmental Tests for Finished Wire and Cable 99
8.1 Copper corrosion 99
8.2 Ozone resistance 100
8.3 Copper sulfate test for zinc coatings on formed and unformed steel strip (Preece test) 102
9 Burning Characteristics Tests 105
9.1 FT2/FH/Horizontal flame 105
9.2 Burning particles (dropping) 107
9.3 FT1 108
9.4 FV-2/VW-1 110
9.5 FV-1/Vertical flame 112
9.6 Vertical tray flame tests (Method 1 – Vertical tray and Method 2 – FT4) 112
9.7 ST1 limited smoke 117
9.8 Fire propagation/RPI 119
9.9 Smoke emission 123
9.10 Halogen acid gas emission 126
9.11 Acid gas emission 130
9.12 FT5 (United States and Canada only) 135
TABLES 137

Annex A (informative)

A.1 Method 1: Stranded conductors 181
A.2 Method 2: Stranded or solid conductors 181

Annex B (informative)

Annex C (informative)

C.1 Elongation 184
C.2 Tensile strength 184

Annex D (normative)

Annex E (normative)

Annex F (normative)

Annex G (normative)

Annex H (normative)

H.1 Test enclosure 194
H.2 Exhaust duct 194
H.3 Exhaust fan 194
H.4 Air velocity measurements 194
H.4.1 Within the exhaust duct 194
H.4.2 Within the enclosure 195
H.5 Smoke measuring equipment 195

Annex I (informative)

Annex J (informative)
